

Incluí el mixin, extend y el map en el index.html incluyendo en el mixin el header exportando el mismo y agregando color azul, importando el extend de containerFlex y libros y el map cambiando el color de los libros.

A su vez, agregue los títulos de todos los html con la etiqueta <h1> y también la metaetiqueta “description” en todos los html haciendo un resumen del contenido.

A su vez, tenía agregada la etiqueta <nav> en el menú de los html, <section> en el mapa del formulario.html, header y footer que son etiquetas semánticas también ya las tenía.

En Biography.html agregue las etiquetas <h1> como título principal y <h2> en los títulos secundarios encerrando los párrafos con la etiqueta <article> y dentro con la etiqueta <section>.
